

BLOCKED/INAPPROPRIATE WEBSITES

Sometimes teachers will try to access websites that they feel would enhance the curriculum but the site comes up blocked and it also indicates that this event has been logged. The reverse may also be true where a teacher feels that access is being granted to a site that should be blocked.

This is a fairly common occurrence and is an issue easily resolved. **Here's the resolution:** Write an email to the helpdesk@nisd.net containing the link (address) of the website and the reason you would like it to be unblocked or blocked. The website will be evaluated (usually quite quickly) and then be either unblocked or blocked as needed. These are not campus based decisions.
