
Sandra Day O'Connor High School

DEPARTMENT OF AEROSPACE SCIENCE
12221 Leslie Road
Helotes, Texas 78023

Welcome to the Texas 20082nd Air Force Junior Reserve Officer Training Corps (AFJROTC). Your enrollment in AFJROTC has opened the door to many wonderful and exciting opportunities that others will not have the privilege of experiencing. In this program you will learn about aerospace science and the Air Force, but more importantly, you will learn more about yourself, your community and your potential to succeed.

As the Aerospace Science Instructors we have invested over 40 years in the Air Force with valuable experiences in the operational and training environments, combat and peacetime missions, and various duties at many levels of the Air Force organization.

Our Cadet Corps will be led and managed by the cadet officers and non-commissioned officers (NCOs). These leadership opportunities are competitive and rewarding and will help you develop leadership and management skills that will help you in whatever career or education path you pursue after high school.

Throughout the year you will have the opportunity to participate in many extracurricular and co-curricular activities that you'll find fun and interesting while at the same time providing valuable services to the community. I encourage you to get involved in these activities and experience what AFJROTC is all about!

Again, welcome to the Texas 20082nd AFJROTC! I look forward to teaching you and helping you learn more about the Air Force, your community, but most importantly, yourself.

JAMES M. PAYNE, Lt Col, USAF (Ret)
Senior Aerospace Science Instructor
