Subject: FW: [info] Dr. Martin Cooper's biographical information

Hi to the second graders at Rhodes Elementary in Northside ISD, San Antonio, Texas,

I'm honored that I've made your list and wish you luck in your ambitious project.

I was born in Chicago, Illinois on December 26, 1928 (although this date may seem to make me VERY old, I run 6 miles every other day and spent the last month skinning in Colorado - and working as well).

Best regards,

Martin Cooper

Subject: [info] Dr. Martin Cooper's biographical information

The second graders at Rhodes Elementary in Northside ISD, San Antonio, Texas are researching outstanding inventors and inventions in communication. Of course, Dr. Cooper and his cell phone have made our list. However, we cannot find his date and place of birth. We are hoping that you can provide that. Our students are making an interactive timeline for publication on the web, and we want to make sure our info is complete and up-to-date.

Your help would be greatly appreciated,

The second grade students
Frances M. Rhodes Elementary
