

Science Fair Board Display Layout

Each individual project board can include different information be arranged in various ways according to the preferences of the presenter and the nature of the experiment. Several general principals do apply however. Obviously, it is best to include great depth and detail while stile maintaining visual clarity. The layout should be pleasing to the eye and unfold in an orderly manner. The name of the student who owns the board should only appear on the back of the board (preferably written with a large black marker). The scoring of projects at the SEA Science and Engineering Fair will be based on **Creativity of Topic (30%)**, **Scientific Thought (30%)**, **Thoroughness (15%)**, **Skill (15%)**, and **Clarity (10%)**. All boards must be **no more than 30** inches deep, 48 inches wide, and 108 inches tall when set up for display.

Display Board Example (*other reasonable arrangements are possible*)
