#### MENTAL HEALTH TIP of THE MONTH

Getsomesleep. Easier saidthan done, but sleep deprivation is detrimental to a person's thinking, and their physical and emotional state. Most young people need eight to nine hours of restful sleep to function at their best. It's not easy fitting this into a schedule filled with academic, social and recreational activities, but it sure has a big payoff. Try to have as regular a sleep schedule as possible, and you'll generally find that your "biological clock" will remember when to fall asleep and wake up.
